

ABSTRACT

1       The present invention describes a solid calcium  
2       hypochlorite product formulation, including a polymeric  
3       alkali salt, which formulation exhibits improved  
4       environmental stability and shelf-life while simultaneously  
5       inhibiting scale in dispensing equipment, as well as in and  
6       on feed equipment used for delivering a calcium hypochlorite  
7       solution to a water stream which is to be treated.
